

**A presentation held by
Kish Institute of Science and Technology affiliated to Kish Free Zone Organization
And
Iranian Research Organization for Science and Technology**

**Kish Free Zone Area Event on
"Blue economy Investment"
Kish Island, Persian Gulf, I.R. IRAN**

Date: February 2020

Venue: Kish Island, I.R. IRAN

The concept of “Blue Economy” is a new opportunity to foster economic growth in production of food, medicine and sustainable energy for the countries neighboring seas and oceans. The main focus of the event is analyzing investments in “Blue Economy” in Kish Free Zone Area.

This event would ultimately help raise awareness amongst all stakeholders about the issues relevant to marine bio-resources, particularly the role of Marine Natural Products in “Blue Economy” development.

Event's main Topics:

- **Marine Pharmaceuticals**
- **Marine Nutraceuticals**
- **Marine Food Additives**
- **Marine Cosmeceuticals**
- **Marine Biomaterials**

The event also hosts workshops on “Microalgae & Relevant Industries”.

Located in the Persian Gulf, 19 km (12 mi) from the mainland, Kish Island is a free economic zone. Since the mid-1990s, encouraging foreign investments and industrial and economic growth of the area has been amongst the main concerns of the Iranian government.

Like any other economic free zone, compared to the mainland, trade standards and economic laws are far more relaxed in Kish Island.

Investment incentives in Kish free zone include:

- 20 years' tax-exemption
- Absolute freedom to transfer the assets and profits of financial endeavors.
- Ease of custom formalities on repeated export and goods transit.
- Custom and port charges exempt for exportation of goods.
- Visa-exempt for non-Iranian visitors.
- 100% ownership for foreign investors.
- Extended guarantees and legal support for foreign investors.

To register for the 2020 Blue economy Investment Summit

Registration at the information desk will be open from from November 1, to December 2, 2019.
